

Air Conditioner

Canadian Comfort Redefined

Vortex 16 Series

Up to 15.2 SEER2

R410A Refrigerant

Omniguard™ Corrosion Protection

Enhanced Coil Design with MHT™ Technology

 Proud Canadian Brand

Upgrade to Cooling, Comfort, and Peace of Mind

The new Kepler air conditioner isn't just about staying cool, it's about smarter energy use, lower utility bills, and reliable comfort all summer long. Built with advanced engineering and modern efficiency ratings, our AC units deliver powerful cooling while reducing waste and operating costs, year after year.

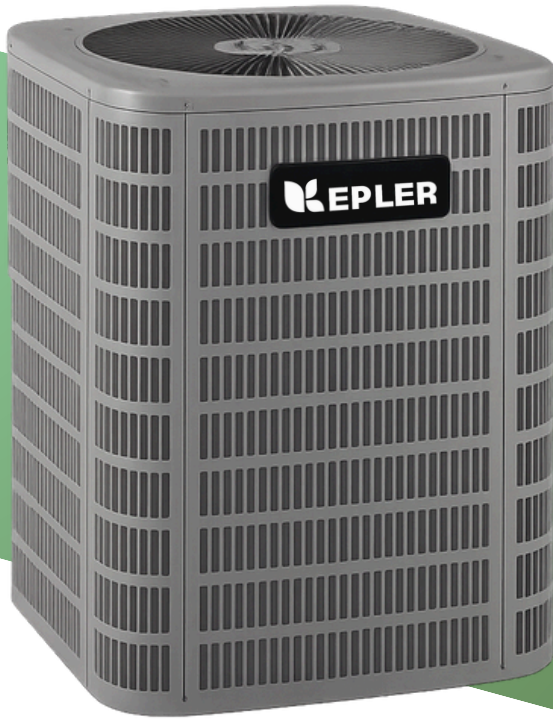

Built for performance. Designed for savings. Tested for your peace of mind.

Simple Savings Through Smarter Efficiency

A high-efficiency air conditioner helps reduce your monthly energy bills. Cooling performance is measured by SEER (Seasonal Energy Efficiency Ratio), while heating efficiency in heat pump systems is measured by HSPF (Heating Seasonal Performance Factor). The higher the rating, the more efficient the system.

Why Replace Your Old Air Conditioner?

- **Rising Energy Bills** – Older air conditioners lose efficiency with time, forcing them to work harder and cost you more each month.
- **Age** – With a typical lifespan of 10–12 years, it's often more cost-effective to invest in a new unit than to keep repairing an outdated one.
- **Modern Technology** – Today's AC units feature advanced controls, quieter operation, and higher energy efficiency. Plus, they no longer rely on R-22 refrigerant, which is costly, scarce, and harmful to the environment.
- **High Repair Costs** – When repair expenses exceed half the price of a new unit, upgrading is the smarter and more reliable choice.

Efficiency Meets Everyday Comfort

Vortex 16 Series

Available Models

 SEER 2
Up to 15.2

4AC16L18P

 SEER 2
Up to 15.2
