Unleash the full potential of the smart thermostat for central systems with our platforms!

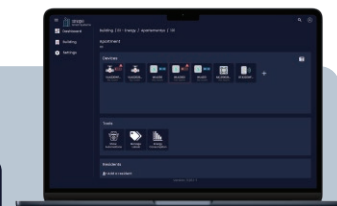

- **Customize your setpoints:** adjust your settings according to your schedule and geofencing.
- **Add your devices to Éco Sinopé:** optimize your energy consumption during peak events*.
- **Screen access control:** explore the different access levels to restrict access to your children or to your customers and employees in a commercial context.
- Consult your **energy consumption graphs**.
- **Set filter change reminders:** ensure air quality in your home.
- **Adjust screen brightness:** adapt your screen's reactivity to your preferences.
- **Change the time display format.**

*Not available in Sinopé Smart Systems.

Neviweb App - Residential sector

Sinopé's Neviweb app is an intuitive interface that allows residents to control their Sinopé smart devices while maximizing comfort and savings. Users can remotely manage energy-efficient devices to optimize their consumption, thanks in particular to the Éco Sinopé feature that enables them to take full advantage of electricity suppliers' energy efficiency programs.

Sinopé Smart Systems - Commercial platform*

The Sinopé Smart Systems integrated management platform is a powerful interface allowing building managers to remotely monitor and control all Sinopé devices, both in residential units and common areas, enabling more efficient management of the building's energy consumption.
